Techniques Make-Up Application Eye Colour – The Right Colors For Your Eye Makeup

Have you ever worked with tips and **techniques make-up application eye colour**? Well, these are basically guidelines that are shared by beauty experts to those women (even men) who are looking for easy and simple ways to help them in their task of applying eye makeup to themselves or to their clients.

When we talk about colors, it is very important to keep in mind that when excessive makeup colors are applied on the eyes, this will not make any good; in fact, it only makes the eyes counter productive particularly when a specific color is being matched precisely with the natural color of the eyes.

Many of the times in a woman's life that she becomes the center of attraction when she wears the wrong color for her eye makeup. You might seem to look at your eye makeup perfectly alright but in the eyes of others, they are a total mess; ugly to behold; and a disaster. Do you have the heart to hear such assessments?

So here are some of the best techniques make-up application eye colour – neutral colors that are considered as the best choices because they are easy to work with different skin types or complexions. And when we talk about neutral colors, we don't mean all shades of brown. As a matter of fact, there are several colors which are considered neutral and works well with their appropriate shades. Such neutral colors include old, gray, blue, olive, vanilla, pale purple, pale pink, beige, and mauve.

It is also very important to know the right shade and highlight of an eye makeup as this is essential in enhancing the natural shape of the eye. And for the colors, it will be great to make use of matte or popularly known as the neutral shades. Light –colored highlighters like white or cream are the best choices.

Important tip: light colors can make the eyes larger or closer while dark colors can make the eye area seem to look smaller or farther away. To create your desired illusion, it is always very important to remember that light and dark eye makeup should go along together very well keeping in mind the shape of your eyelids, too.

Here is the general techniques make-up application eye colour. There is a need for you to make use of the following four different colors for your eye shadows:

*Always apply eye makeup tips using natural-based tone

*Apply the main color of your choice

*Apply lighter shade for highlighting

*Apply darker shade for emphasizing

Aside from the **techniques make-up application eye colour**, you also need a mirror to help you point out the weak and strong effects of your eye makeup colors.
